

Get PCI DSS compliant with BT Comply

Unique learning portal, keeping you legal, without sending your staff to sleep.

Payment Card Industry Data Security Standard (PCI DSS) compliance can be a bit of a headache for businesses. You not only have to ensure your systems and processes meet the appropriate standards, but also provide training for all of your employees on their legal responsibility. This is a huge legal, financial and organisational burden. But our fully managed learning programme can help take the strain and simplify your PCI DSS compliance learning requirements now and in the future.

BT Comply delivers a fully managed and maintained PCI learning environment. It is accessible from any device with an internet connection and is packed full of features. Using BT Comply enables you to communicate, train and reinforce key messages around PCI standards. You can also track, monitor and report on all activities performed by the company, store or individual. You'll even be able to give access to external auditors so they can confirm your compliance.

The key to our service is having just one supplier taking care of everything, so you don't have to. We'll make meeting compliance simpler, more efficient and much more cost-effective for you.

Key benefits

- reduce legal risk by educating people about their responsibilities
- reach everyone, regardless of audience size or location
- treat compliance in a more engaging way to help people change behaviour and adopt new practices
- integrate regulatory training in compliance into a wider induction programme.

PCI DSS – The facts

Sections 12.4 and 12.6 of the PCI standards mandate the clear definition of policies and procedures and the need for an awareness programme across the organisation*

Retail represents 69 per cent of total UK data breaches** with the average cost of a breach £1.68million***

But a recent survey of UK merchants shows that only 11 per cent are currently compliant, while 35 per cent still don't fully understand the requirements****

**7Safe UK Security Breach Investigations Report

***research gathered by The Ponemon Institute

****survey of 100 retail, financial services and hospitality businesses, conducted by Redshift

Why put your employees through having to read and sign large compliance documents? Research shows that this method is dull and boring. And people won't retain the information, never mind apply it in the workplace.

We've designed the content so that it can be made available at a company, departmental or job role level. This means people only need to complete the sections that apply to them.

We also create themes for all of the courses we design. This helps engage the learner, enabling them to retain and apply their newfound knowledge – so they can really start to live and breathe the standards.

Features

Portal

An environment to house all your PCI learning content.

Content

Includes the creation of a specific set of PCI DSS compliant IT policies adapted for your business by Qualified Security Assessors.

Updates

We update all off-the-shelf content in conjunction with our QSA. This ensures that the content is always up to date, with any new standards automatically added for the relevant employees.

Hosting

All learning and records are securely hosted and content is accessible from any device with an internet connection.

My Library

Dynamic document viewer containing all PCI policies, all in an instantly viewable format linked to learning.

My Learning

Software, hardware and peripheral simulations, compliance learning and induction – in fact any type of learning – all in one place. And all tracked and monitored.

Company and industry news

Communicate with employees by adding company news, PCI information or linking to external PCI RSS feeds.

Quick polls

Add quick polls to your learning and report on the responses.

Auto learning enrolment

Assign learning by function or job role and new starters will automatically be assigned the appropriate PCI learning.

Pre-learning diagnostic tool

Allow employees to take pre-learning knowledge analysis, alleviating the annual burden of re-sitting learning.

About us

BT Learn Diverse is redefining how e-learning is created and delivered. We have over 10 years' experience of delivering learning programmes to large and small companies across a variety of sectors including retail, hospitality, food and education. We have a portfolio of products that can be set up individually or brought together to create a tailored, integrated portal.
